## JUNE 2011

They say there's a fine line between hobby and insanity and our very own Dr. Pepper (Steve) walks this line with one of the largest variety of pepper plants for sale in the Metro Area. Many of these varieties have been grown and tasted by Steve. He has chosen the best of the best to grow from seed in undisclosed greenhouses across the state. This year he has chosen over 130 varieties of sweet and hot peppers with enticing and seductive names such as: Cobra, Corno di Toro, Ecuadorian Devil Breath, Fatali and Georgia Flame. Last year's favorites at the pepper tasting included: Big Fresno, Big Bertha Red and Doe Hill. Steve's peppers and pepper expertise are now available at the Mill. Purchase any plant and Steve will personally hand pick one of his peppers just for you; **FREE!**

Peppers are easy to grow. Steve plants his peppers from June 7 – 22. For more information on how to grow peppers: <http://tinyurl.com/24f28u>

(Peppers are a good source of vitamin C, thiamine, vitamin B6, beta carotene, and folic acid. Peppers also contain a large amount of phytochemicals that have exceptional antioxidant activity.)

### Product Spotlight: AMAZE

Amaze is the premier grass and weed preventer for all ornamental applications. Sprinkle right over the top of your flowers and plants for up to 4 months control! A hand-held spreader is an easy, inexpensive and fast way to apply it. Be sure to do all your cultivating before using Amaze. If you work the soil afterwards, you'll break the soil bond formed by the herbicide and make it ineffective. Read the label completely before using and follow instructions exactly! This product is made in the USA and the company is 100% employee owned.

### Yard and Garden Tips for June:

- Spray Weed Free Zone or Speedzone on creeping charlie, clover, dandelions and thistle now!
- Put down Amaze after pulling out all weeds in garden beds.
- Plant heat-loving tomatoes, peppers, eggplants and melons. We sell tomatoes too! Winners from last year's taste test: Aunt Ruby German, Amana Orange and Sweet Baby Girl
- Mulch gardens late this month after soil has warmed to reduce weeds and retain moisture.
