

Timely Turf Tips

October 2017

And the winner is... Last month's 9th annual tomato and 8th annual pepper tasting event results are in. The tomato categories were Full Size Tomatoes and Cherry Tomatoes. First place for Full Size Tomatoes was *Pork Chop*. Second place was *100 Pudov*, with *Kellogg's Breakfast Potato Leaf* taking third. The top cherry tomato was the perennial favorite, *Sun Sugar*, followed by *Ground Cherry* and *Lemon Drop*. The pepper categories were sweet, mild, and hot. For sweet peppers, *Giant Marconi* led the voting, with *Carmen* and *Round of Hungary* tying for second place. Third place was *Aji Dulce Pimientinos*. *Relleno Chile* received the most votes in the mild pepper category. *Brazilian Starfish* and *Chocolate Cherry* tied for second place, with *Rezha Macedonian* placing third. Hot peppers were led by *Ring of Fire*, followed by *Aleppo* in second and *Basque Sheep Herders* and *Krimzon Lee F1 Hot* tying in third. Thank you to all the people that participated in judging such enjoyable events. See you next spring shopping for your favorites.

October tips for the lawn and garden:

- Keep mowing the grass at 2 ½ to 3 inches tall, gradually decreasing to 2 to 2 ½ inches over the last two or three mowing of the year. This decrease at the end of fall should aid in leaf removal and reduce the chance of snow mold next spring.
- Mulch light accumulations of leaves with the lawnmower, being sure the grass is visible through the shredded material. Heavier buildups of leaves need to be removed to prevent damage to the lawn over the winter. Excess leaves can be bagged and set aside to be used to protect tender perennial beds. Just remember to wait and apply the bags after the ground is frozen.
- Apply fall fertilizer at a rate of 1 pound of nitrogen per 1000 square feet. The University of Minnesota Extension recommends all fertilizer be applied before October 15. We recommend Hugo Feed Mill's brand 25-0-15, with 50% slow-release nitrogen for a longer feeding period. A 40# bag covers 10,000 square feet and there is a coupon attached below.
- Falling temperatures can trigger a change in plant growth that aids in controlling tough-to-kill broadleaf weeds, like creeping Charlie, dandelion, and clover. Spot treat weeds early this month with broadleaf weed control products like SpeedZone and Weed Free Zone for weed-free grass next spring.
- Shop for spring flowering bulbs. Planting time is mid-September through mid-October. Bone meal is available at the mill.
- When cleaning up the garden, dispose of any diseased plant material, overripe fruit and vegetables in the trash, not the compost bin. Removal of this material should help decrease disease and overwintering insects.
- As temperatures fall, Box Elder Bugs may cluster on the warm, sunny sides of buildings. Spraying them outdoors will reduce the number that find their way inside and become a nuisance. Save by using the discount coupon attached below.

Plant your garlic by mid-October.

See the folks at the feed mill for your seed garlic. Choose from five varieties or plant them all to find out your favorite. They can help with planting directions, fertilizer, and mulch.
