

Timely Turf Tips

January 2019

Happy New Year! The start of the new year is all about resolutions. This year resolve to have a plan in place to get the most from your lawn or garden. Was there an area that could have been improved? Are there some areas that could use some dividing to produce new growth or different plants to better suit the site? Want to try some new varieties in the garden? Arriving soon, seed catalogs are a good place to begin searching for new ideas. Try the library with their selection of horticultural magazines and books for more suggestions. Having a plan in place can be the beginning of a productive year.

Cold Weather Tips for Bird Feeding

- When trying to attract birds, fresh water can be as important as food for winter bird feeding. Consider adding a heated birdbath to give birds an open source of water during the coldest of months.
- Be sure to keep birdfeeders full of high calorie and high fat foods to provide the needed energy for winter survival. Use the coupon below for a *Wildlife Science* Suet Plus cake.
- Stamp or shovel snow around the feeders to provide easier access to spilled seed for ground feeding birds.
- Winter survival can cause birds to gather together in larger flocks and can lead to the spread of disease. It's important to keep feeders clean by regularly replacing old seed and washing feeders that have become too soiled by birds. Clean by removing all seed, wash to remove any residue on the feeder, and disinfect it with an application of bleach solution (nine parts water, one part chloride bleach.) Remove any remaining solution by rinsing in clean water and allow the feeder to completely dry before refilling.

Cold Weather Tips for Pets

- Outdoor pets require additional food and a fresh, unfrozen water source during these colder months. Check to see if the water is not frozen too quickly to allow the pet access to enough water. Consider adding a heater to the water bowl if necessary. Rubber or plastic bowls are preferred, not metal.
- After walking your pet outside on winter streets, it is a good idea to wipe off the pads of their paws when they enter the house to remove any salt or chemical residue that may irritate the skin or stomach lining if licked off.
- Trim any excess hair between their pads if ice chunks develop on their feet during winter walks to lessen the irritation caused by the ice.

We have calcium chloride and magnesium chloride for cold weather ice melting. Poultry grit is great for traction. Keep some in your car and by the front door to reduce slipping. Save some cash by using the coupon below.
